Dear Bud,

9/4/80

When Lil runs the copying machine again she'll make copies of the John Ray record I think reflects well on Earl Silbert and of a London Sunday Times 8/31/80 story I received today.

The latter suggests that there is more to the Paisley case than you've mentioned or I've seen in any other paper. Of course, it may be only that I had no knowledge.

The CIA/ banking and dope suggestions are provocative.

I suppose other stories have appeared in Australia, too.

Embassy press attaches ought to know, as well as correspondents.

Best,
